# BULLetin

No. 10

November 1998

## Next Meeting

7:30 PM, Thursday, November 12<sup>th</sup> at  
Jun's Electronics, 5563 Sepulveda  
Blvd. (Exit the San Diego Fwy (405)  
at Jefferson and proceed east to  
Sepulveda Blvd.)

## November Program: Maartin Who?

Willem Van Rijn, a distant cousin of Rembrandt, the painter, started as a house painter, trading on his cousin's chiaroscuro. When he had earned enough money, he purchased a sailing vessel and set off exploring. He ran out of water east of Puerto Rico, which was then known as "Brooklynia." An albatross got caught in the big medallion he wore around his neck, and the planks making up the side of the ship started to shrink. He was lost for seven nights, forced to eat driftwood and remnants of sand castles drifting from the primitive resorts at Aruba.

Finally, he made landfall at a beautiful island he was going to call "Grosser Willem." The name didn't have enough pizzazz, so he decided to call the place "Big Marty." One thing led to another, and he finally decided to call it "Sint Maartin." "Marty" didn't have enough "a's" so he took one from "Saint." That's the whole truth, and if you don't believe me, ask Andy, WA6WDX at the November Meeting.

## The Romanisky Conspiracy

By Andy Romanisky, WA6WDX

My travels took my wife Marilyn and me to the island of St. Martin for a week, September 25 through October 2, 1998.. We stayed at the Pelican Resorts on the Dutch side of the island of "Sint Maarten". Fortunately, we arrived 3 days after "Hurricane Georges" had passed through, slightly missing the island and slamming into Puerto Rico and others big time. Where we stayed, there was minor wind damage, debris, power out for only days. Things were back in order as we arrived. With only a week on the island, it was a balancing act between operating Ham Radio in a DX place, quality beach time and "XYL time." All considered, managed to work about 500 contacts from the island. I put up an inverted "V" dipole antenna for 15, 17, 20 meters, (25 feet high), used a Yaesu FT-890 transceiver, 100 watts. It looked right out at the ocean, pointed West/East and the DX rolled in. I was pleasantly surprised to work easily into the USA, Europe, Japan, VK land, etc.. I worked perhaps 21 members of the SCDXC, too. Thanks to all who showed up to call me. I must say some of the strongest signals were from DX club members.

Why is Andy Romanisky, WA6WDX smiling?

## Death to Ticket Folders

By Earl Derrick, BULLetin Staff Writer

"Hank" Arney, KN6DI holds mutilated ticket.

All but forgotten in the archives of Interpol is the curious account of the 1891 Raffle Riots of Ruckenhau-on-Rhine. Baron Gustav Von Zelfone had won for years. A sharp-eyed peasant caught the Baron folding the edges of his raffle ticket. The ensuing melee resulted in numerous injuries. The Baron was dipped in hot schlag, dusted with goose feathers and run out of town. In 1954, during the height of the Saturday Matinee Dish And Silverware Giveaways, the U.S. Government granted \$200,000.00 to Wapakoneta State Technical College to study the effects of ticket curling. The results were

## Packet Spot Iron Cage Free-For-All Derby

by Harvey Shore, K6EXO

**O**K so the PUKA (sic) let the cat out of the bag and told y'all that I was in KL7, and forgot to arrange to have the logs processed for

the August derby. Actually I don't have a second op who can do it. Anyway, we are back in the saddle — had a great time playing "being rich" on the Crown Princess. Great food, beautiful landscapes. We used 12 rolls of film, more gift shops than I have ever seen. And no hams! I tried to raise a contact or so on the repeaters but no dice. Next year SV, SU and 4X4.

This month (September) shows a new contender: **W6AUG**, a strong second.

I am looking for ideas for the yearly prize. Any suggestions?

**We are accepting membership dues for 1999. Send check made out to: "Southern California DX Club" (\$18.00) to Harv Shore, K6EXO, 6433 Pat Ave. West Hills CA, 91307. Beat the rush!**

Here are the September Stains:

## President's Soapbox

by Will Angenent, K6NDV

**F**G5BG had about 8400 Q's with well over 13 million points. I guess you can say the boys did excellent! Con-

gratulations. So far, 1st place in the world as Multi/Single. I am sure that most of us have worked them at least on one band, I know I worked them several times (just as I am writing this I talked to Larry on 75 meters and they are ready to wrap it all up). From what I have heard, they had a real good time and we will hear all about the whole expedition at the Christmas party when they will do the program for us.

Speaking of the Christmas party, please send in the registration form or bring it to the meeting, so we know how many we have and make sure you have a seat. Rich, WU6T and me are working on some real nice raffle prizes for this event. We already have a Force 12, C3 antenna and are working on a Icom 706 HF rig. A MFJ antenna analyzer will be on the table together with many, many other items. Charlotte has something for the deserving YL's who are attending the party.

The bands have been opening up this last month with some nice DX. I have had a few nice QSO's on 12 meters, worked 5A1A, 3B8CF E31AA, E30HA to name a few. So looks like things are picking up.

I ordered a Force 12 C-31XR for my own QTH, this is a real "aluminum cloud." I will let you know how it works in the next *BULLETin*.

Hope to see you all at the meeting and if possible before that at Shakey's.

...Will, K6NDV

## MINIPROP PLUS Predictions

by Shel, W6EL

These MINIPROP PLUS predictions for the five prime HF bands show the times when propagation is expected to be best from Los Angeles to several locations that are expected to be active during the coming month. Other times are possible, but with weaker signals or lower probability. Openings are not expected on bands that are not listed. A solar flux of 120, corresponding to a sunspot number of 67, and an average geomagnetic field are assumed. Sunrise/sunset times are at the DX location. All times are UTC.

### DX Location:

JY Jordan - 11/5 to 11/16

Beam 23 degrees

Sunrise/sunset (on 11/12) 0403/1433

FH Mayotte - 11/12 to 11/25

Beam 39 degrees

Sunrise/sunset (on 11/19) 0226/1503

D2 Angola - to 12/15

Beam 71 degrees

Sunrise/sunset (on 11/27) 0430/1701

XZ Myanmar - 11/21 to 12/6

Beam 322 degrees

Sunrise/sunset (on 11/29) 2352/1054

FT5 Amsterdam I. - 11/27 to 12/25

Beam 248 degrees

Sunrise/sunset (on 12/9) 2325/1359

### Band/Best Times:

80: 0200-0330.

40: 0000-0500

20: 1430-1730 and 2000-2030.

Also long path 1400-1530.

15: Around 1600.

40: 0100-0230. Also long path 1430-1500.

20: 2230-0130. Also 1430-1630.

Dot... dot... dot...

By Guglielmo Pookah, E1EIO

**H**arv Shore, K6EXO, reports this incident to the Pookah... (By the way, **Hoirv**, it's **POOK-AH**, like in **MOOKIE**, not **PUKA**, like in **BARF!**)... His **mouse** disappeared. He could not function with out it and it was gone. Disappeared. Lost or stolen. "That meant my computer was disabled. I was forced to go out and buy a new one (Track Ball this time). But where could the trusty little fella have

gone? The good news: I found him, or, at least I heard him. He moved to the club repeater and earns his keep by announcing the "**SIX**". I know he will be happy there. He never complains." This is a swell story, **Hahv**, but we already had **Edgar**, N6OU up there. Give **Edgar** a call, he probably has your **mouse**... WA6TLA, Elliott, and spouse, **Georgia**, N6GAL, recently were seen in the company of another famous couple, Toronto's **VE3MR** and **VE3MRS**. 'TLA was doing empirical **research** on his hypothesis that **Macarena dancers** in Canada cause **flutter** on signals coming over the North Pole on **Saturday nights**... I don't know about **you**, but my dog, **Rover** sure enjoys his **biker outfit** from the **Damark Catalog**. Had to get it for him, otherwise, this would be my **absolutely, completely, totally last** catalog... Dot's to you, kid,

...Gugli

(The *BULLETIN* is not responsible for Pookah's alledged observations. Gugli's portrait by 'Drew Duncan exclusively for the SCDXC *BULLETIN*.)

## Romanisky Conspiracy

(Continued)

Very impressive to hear the California DX'ers': Big GUNS such as W6EA, K6FG, WU6T, W7RF to mention a few. Here is a list of stations worked from PJ7/ WA6WXD: K6OJ, K6NDV, K6FG, AA6RK, N6ED, K6OHM, K6SMF, W6EA, K6YRA, W8DX, KP3YL, W6/G3MHV, WU6T, W7RF, K6YUI, K6RO, KG6OK, KQ6DL W6BH, N0FW (past president, N0AFW, 1992), WA6NRQ ( member from 1977 living now in Hemet.)

## Packet Spot Derby

(Continued)

On to October! Well it was bound to happen: I found the limit to the size of the file the software can handle. It is 5000 Q's. So, we lost the spots for the first few days of the month. As you can imagine we had almost 4000 just during the CQWW Phone contest. Yep, I will make a change so we will not lose any in the future. 1762 spots were made by club

members. As some of the previous hi-scorers were away for the WW there is a new monthly winner! Have fun in the CW test coming up!

# Death to Benders!

(From Page 1)

conclusive: Raffle tickets, propped up on dog-ears were picked 62% of the time.

Father Harvey O'Hanrahan was excommunicated when, in 1962, he declared a raffle null and void because so many tickets were bent, it was impossible to fit all of them in the pickle jar.

An obscure law, enacted in Anchorage, Alaska in the early seventies made it a misdemeanor to "curl, bend, fold, spindle or otherwise distort a raffle ticket." Inuit Branscome DuFine explains: "It just took all the fun out of Raffles. I never buy tickets any more."

Now, the dreaded raffle Ticket Plague has hit the Southern California DX Club. "If the members are gentlemen... why do they bend raffle tickets to take advantage of other members?" asks Dan Arney, KN6DI, "That is cheating."

"I'm a bender, and I'm proud," bleats a member who asked not to be identified, "If you want to win, you got to bend." The *BULLETin* reached Harvey, W8DX who won the September prize: "I feel so bad. I didn't know it was cheating to put those little dog-ears on the ticket. I'm going to give back the Alinco cup," he said, contritely.

"(The cheats) have to look themselves in the mirror every day when they shave," Arney continues, "I think all members should bend the tickets, or, (benders) should make a donation to the kitty, but cannot win at drawings."

Ffloyd Gjivner, KE3SUP, is Raffle Ticket Sergeant-at-Arms for the East Rockfish Radio Klub. He has been policing their raffles for five years: "There's nothing I wanted to do around the club, but when this came up, well, it gave me a chance to wear a badge and a gun and push the scumbags around. It's great."

"I have seen several guys bend the tickets even in plain (sight) of the group." Dan "Hank" Arney writes, "a couple of them are very consistent winners."

"When I collar a folder," Gjivner explains, "I search his place and we raffle off anything that looks like winnings. Once we raffled off a guy's Pacemaker. Served him right."

"I put in \$20.00 every drawing to help out. No More!" Arney proclaims, "Let the small time cheaters pay for it."

Merle Eversharp, of the East

Mohican DX'ers thought of the most ingenious solution: "I just bring my Proctor-Silex Steam and Dry and iron all them tickets before I put 'em in the bin. Sometimes they stick together and one time the winner was so hot it set the callous on Earl Gombertz's thumb afire. That was something you don't see every day."

The Rockfish Klub finally came up with an alternate solution when Ffloyd was convicted of murder: Wrought iron tickets. At first there was a problem with magnetism, and once the drum broke loose and busted someone's foot, but for now, there are no cheaters in Rockfish.

## Fresno Report

by Dick Letrich, W6KM

A meeting was held at the Holiday Inn, Centre Plaza in Fresno today with the 1999 Convention Chairman, George Allan, W6YD, Dick Letrich W6KM, NCDXC President and Robert Long, Director of Catering. Many details about the upcoming 50th International DX Convention were discussed and plans made. Quite a few DXers from both the North and South had expressed a deep concern about the PARKING FACILITIES. It had been rumored that many were concerned about the safety of the vehicles and their contents, in addition many voiced concerns about the areas set aside for RV vehicle parking. The first issue discussed was the rumored vandalism of vehicles at the last convention. Hotel records reveal none were reported at the last convention nor have I been able to substantiate any actual incidents. Mr. Long assured me that there have been no problems since 1990. It is true that the adjacent high rise parking lot owned by the city, has been condemned it is adjacent to the Hotel and was used by many guests. The parking garage in question is scheduled to be razed and rebuilt within the next 6 months. If completed on time, this parking would once again be available for the convention. In the interim the Hotel has contracted with the adjacent City Owned Convention Center for exclusive use of a sufficient number of spaces to accommodate all expected registered guests. They will block off all entrances to the Hotel Parking and will have a Security Guard assure that only Hotel guests will be allowed to park. In addition RV's will be allowed to parking the rear west side as before. A 24 hour walking Security Guard will be provided to Police all vehicles at the Hotel and its set aside area at the convention center parking lot across the street. They will be on duty from Thursday afternoon until Sunday afternoon.

Actual driving time from Visalia to Fresno on Highway 99 was between 20 to 25 minutes as George and I drove the distance to Visalia from Fresno and back (to be) able to answer several who insisted that this time was to be anywhere from 45 minutes to one hour. George, W6YD has made arrangements with Mr. Long to visit again in Mid-January. If you should have any questions, Please contact George, W6YD.

## BULLETin Editor To Step Down

by Ragnar Pflegm, BULLETin Staff Writer

The January, 1999 edition of the Southern California DX Club BULLETin will be the final outing for editor, Harvey Laidman, W8DX. BULLETin publisher, Al Friedman, K6YRA will also be moving on to independent production. Both workers cite "business and personal commitments." The January, 1999 number will mark two full years with W8DX and K6YRA at the helm. Says Laidman, "Al and I wish the new editorial and publishing staff the best of luck. We will, of course, always be available for consultation. Unfortunately in this world of 'sound bites,' nasty humor, political correctness and ham radio publications that take themselves very seriously, the wacky, gentle humor of the BULLETin is a gnarled, purple sore thumb."

Persons interested in taking over the BULLETin should contact the editor, publisher, or any member of the SCDXC board as soon as possible.

# Langdons Boffo at October Fest

Contributed by Al Friedman, K6YRA and Andy Romanisky, WA6WXD

Andy Romanisky, WA6WXD reports: "The program given by Terry (W6/G3MHV) and Mady (KP3YL) was especially interesting to me. I have traveled to many of the places they visited in Russia. The slides were very good, vivid pictures of the areas."

"The Langdons traveled through Russia on business and pleasure," Al Friedman, K6YRA added. "Their goal was to visit Tuva, 'UA0Y' in zone 23." Terry and Mady journeyed through areas in Asiatic Russia that had been seen by few Western visitors.

In a particularly hospitable gesture, perhaps out of respect for the distinguished visitors, they were issued the calls UE9WTL (Terry) and UE9WML (Mady) to be used anywhere in Russia.

Terry Langdon (left) W6/G3MHV and Mady Langdon, KP3YL. (Photo by Al Friedman, K6YRA.)

## DXpedition To Campbell Island, ZL9 - January 1999

By Steve, KF2TI

*(This is an excerpt from a "donation soliciting" letter intercepted on its way to the "DX press." It has been edited for clarity and to highlight information of interest to DX'ers. SCDXC will make an appropriate donation to the Northern California DX Foundation, earmarked "Campbell, 1999.")*

Our group is now in the final planning stages for a DXpedition to Campbell Island in January 1999 following our highly successful DXpedition to Raoul Island in the Kermadec Group in May 1996. Our group was awarded the "ARRL 1996 DXpedition of the Year Award" We will undertake an even more difficult DXpedition in January 1999.

Our group will consist of 11 operators: 2 from the United States, 1 from Canada, 1 from Japan, 1 from Northern Ireland, 1 from Singapore, 1 from Ireland and 4 from New Zealand who will each contribute US \$2,000.

Having such a group of internationally experienced and recognized operators with some 270 years plus operating experience between us is an indication of the dedication we are prepared to offer in satisfying the needs of amateurs world-wide. A considerable effort will be given to working the European DX community. Of the team of 11, four members took part in the ZL8RI DXpedition and three took part in the VK0IR DXpedition. We intend to operate all modes and all bands and we will endeavor to make use of satellites/SSTV etc. where possible.

Because of the impending status of New Zealand's Southern-most islands in the form of a "World Heritage Park," future ham radio activity cannot be guaranteed in the future and hence our desire is to satisfy as many of the DX

community as possible. As we are all well aware, DXpeditions do not just happen and they take a lot of very hard work as well as very serious negotiating and planning. We are anticipating that the total cost of undertaking the ZL9 DXpedition to Campbell Island in January 1999 will be in the vicinity of US \$65,000. This is quite a considerable increase on our ZL8RI costs which were \$US 34,000. The vessel charter costs alone are approximately US\$40,000.

In supporting this DXpedition you can be assured that we will have all the necessary permits, licenses etc. and a suitable vessel named "Braveheart" has been arranged for transportation to and from Campbell Island. The vessel is a 117 foot ex Japanese Government Fisheries Research vessel which is now New Zealand owned and is currently undergoing a major refit to accommodate our needs for this DXpedition.

# Heard and Worked

by Mark Weiss, K6FG

**S**ignals don't  
get to the sunny  
shores of Southern  
California like they  
get everywhere else.  
Sometimes, a band  
is open for just a  
few minutes.  
Sometimes, a rare  
country appears at a

crazy time or frequency. Here are selected  
reports from local stations. Send your  
report for November to the Editor.

## Ham Puzzle

by Milt, W6RJO

## An Actual, but Weird Oscillator

(Are you standing in front of your cyclotron? Observe the beam exit at the dees.)

(a) The load is the beam current which uses the oscillator power to accelerate the beam ions.

(b) The power taken by the load is 10KV times 1 amp = 10 KW.

(c) It is really a Hartley oscillator.

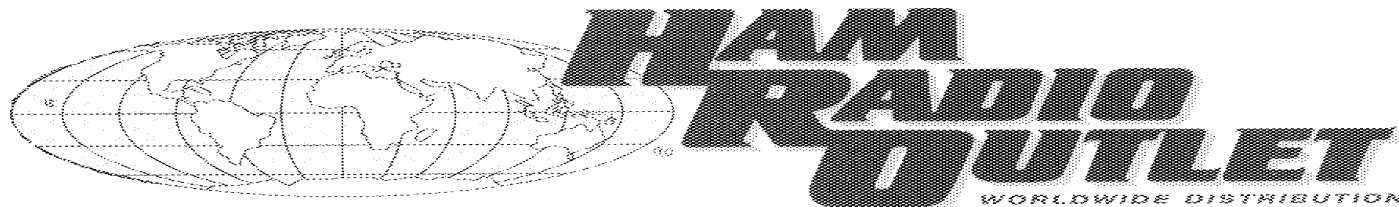

*Hard to believe, but we have no winners this month! What a shame, because we had a really great prize, and now, we have to return it to the BMW dealer. Perhaps you are noticing that there is no new puzzler this month? Milt is at a homeowners association meeting, defending himself against his angry neighbors. His cyclotron was making a hell of a racket, and sucked the picture right off the local TV screens. He also got an "OO" report for excessive chirp and hum from his 10 KVA motor-generator set. The FBI has a few questions, too. Milt should be back next month (we hope) ...ed*
